Professional Summary

Java Backend Developer with **2.6 years** of expertise in building scalable, high-performance applications using **Java, Spring Boot, and Microservices architecture**. Proficient in RESTful API development, multithreading, database optimization, and API integrations with Angular. Skilled in applying security best practices, performance tuning, and scalability improvements in Agile/Scrum environments. Committed to delivering clean, maintainable code and continuously adopting emerging technologies.

Work Experience

Drabito Technologies Pvt. Ltd.

Dec 2023 – Present

Software Developer

Noida, India

Projects

ZEP360 – SaaS Platform for Solar & EPC Businesses

- Engineered and optimized **20+ RESTful APIs**, improving response time by up to **90%** and ensuring scalable performance across modules.
- Integrated **Razorpay payment gateway** to enable secure subscription billing, top-ups, and payment processing.
- Ensured secure access and role-based controls using Java + Spring Boot, with MySQL for data persistence.

WorkED: An EdTech SaaS Application for after school program management

- Designed and implemented **15+ RESTful APIs** for user registration and onboarding, improving flexibility across modules.
- Built Classroom module with attendance tracking, grade marking, and badge awarding for **1000+ students**.
- Developed student transfer feature between groups and program events with client-specific workflow customization.
- Resolved critical bugs and optimized database queries, improving landing page performance by **80%** across **8+ user roles**.

WorkED Operations Hub: Centralized Support & Workflow Automation Platform

- Developed the portal end-to-end to automate internal operations and reduce manual support dependencies across departments.
- Built custom workflow execution engine with **Quartz Scheduler** to automate **1000+ emails and Twilio SMS** campaigns.
- Designed GraphQL and RESTful APIs-powered dashboards and secure modules for real-time data across **5+ modules**.
- Implemented **RBAC** system to manage permissions across **3 user types** and operational levels.

Inn4Smart: SaaS-Based Platform for Smart Society & Energy Management

- Designed and implemented multi-wallet architecture to track balances for electricity usage and society management services separately.
- Developed **cron jobs** to automate low-balance alerts via **SMS and email**, reducing service downtime by **30%**.
- Integrated **QR code and OTP-based** gate pass system for secure visitor entry, enhancing society-level access control.

Skills

- Programming & Frameworks:** Java (Core, Java 8, 11, 17, 21), Spring Boot, Spring Security, Spring Data JPA, Spring Data Redis, Spring Data Elasticsearch, Spring GraphQL, Hibernate, Angular, JUnit, Mockito
- Databases, Caching & Strategies:** MySQL, PostgreSQL, DynamoDB, Redis, DB Indexing
- Architecture & Practices:** Microservice, SaaS, Query Optimization, Scalability, Security Best Practices, Agile/Scrum Methodologies, RESTful API and GraphQL API Development, SOLID Principles
- Cloud & Tools:** AWS (S3, SES), GCP (Firebase, OAuth2), Maven, Gradle, Postman, Jira, Application Deployment, Git (GitHub, GitLab, BitBucket)
- Soft Skills:** Team Management, Team Collaboration, Client Communication, Mentorship

Academics

Master of Computer Applications

2018 - 2021

Noida Institute of Engineering and Technologies

6.7 CGPA
